

# Losing the Faith

© BMI by Dennis J. Barela

Children crying in the streets  
The middle class is fading fast and soon to disappear  
The system that the wealthy cheat  
Lobbying and litigating wealthy engineers  
Now I'm losing all hope  
And I'm losing my will  
And in the end when it's your time  
Just who will suffer for your crimes?  
Your conscience screaming in a guilty state  
I'm losing the faith

Singles coupling out of fear  
Marry, prosper, procreate before it's time to leave  
The children pay for it in tears  
The qualified are sidelined and unable to conceive  
Now I'm losing all hope  
And I'm losing my Will  
Society and biology  
At war to shape humanity  
Endangered species called the human race  
I'm losing the faith

(Bridge)  
Been searching all my life  
But I guess I gotta wait  
I can't believe in nothing anymore  
Without you  
I'm losing the faith

People dying in the streets  
Killing for interpretations of the ancient words  
Cultures vanish in defeat  
Religions turning profits as they pass laws for the herd  
Now I'm losing all hope  
And I'm losing my will  
If God would take a closer look  
At all the words that we mistook  
Would razor wire replace the pearly gates?  
I'm losing the faith
